PROFESSIONAL SUMMARY

Computer Science graduate with six years of hands-on experience in the Forex market, combining analytical thinking, disciplined risk management and technical-analysis skills. Also skilled in HTML web development, AI prompt engineering and AI video creation. Passionate about using digital tools and AI to solve practical problems and create engaging content. Seeking an opportunity to contribute to a professional team while continuing to grow technically and creatively.

PROFESSIONAL EXPERIENCE

Forex Trader | 6 Years

- Monitored currency-pair movements and analysed market behaviour using price charts and technical-analysis concepts to assess potential market direction.
- Applied strategy-based trading setups with a strong focus on risk management and capital protection.
- Reviewed market conditions and trade ideas with patience, discipline and informed decision-making.

TECHNICAL & DIGITAL SKILLS

AI Video Creation

- Turn concepts and written prompts into video content using AI-powered tools.
- Plan video ideas, prepare prompts and generate AI-assisted scenes for short-form, promotional and storytelling content.
- Created all AI-generated videos published on my Facebook page, **Realify AI**: View video portfolio

AI Prompt Engineering

- Write and refine clear, context-rich prompts to get accurate outputs from AI tools.
- Use prompt-based workflows for ideation, writing support, research assistance and creative tasks.
- Review and iterate on AI-generated results to improve quality.

Web Development (Foundational)

- Build and structure basic web pages using HTML, including headings, paragraphs, links, images and page layout.
- Actively expanding knowledge of broader web-development technologies.
